

COMPANY PROFILE

Integrated contractor for built, connected and digital environments.

Construction | MEP | Infrastructure | ICT & ELV | IT & Digital Solutions

Riyadh, Saudi Arabia | 2026

BUILD | CONNECT | DELIVER

One partner. Multiple disciplines. Accountable delivery.

A practical operating platform for construction, building systems, technology and ongoing support.

01

Built Environment

Construction, finishing, civil coordination, site development and structural works.

02

Building Systems

Electrical, mechanical, HVAC, plumbing, fire protection and coordinated MEP interfaces.

03

Connected Systems

Structured cabling, active networks, CCTV, access control, fire alarm and ELV systems.

04

Digital Enablement

Managed IT, business applications, dashboards, workflow automation and reporting.

Purpose, principles and growth direction.

VISION

To become a trusted provider of integrated technical and construction solutions, recognized for responsible execution, professional service and sustainable growth.

MISSION

To deliver practical, safe and quality-focused solutions that meet project requirements and create value for clients.

Improvement

Service portfolio

01

Construction & Civil

Buildings, civil works, site preparation and architectural finishing.

02

Roads & Earthworks

Road works, excavation, backfilling, grading and external works.

03

Structural Steel

Steel structures, fabrication coordination and related installation support.

04

MEP & HVAC

Electrical, mechanical, HVAC, plumbing and fire-protection systems.

05

ICT & ELV

Racks, networks, CCTV, access control, fire alarm, PA/BGM, IPTV and intercom.

06

Maintenance & Renovation

Corrective works, refurbishment, general maintenance and operational support.

07

Landscaping & Site Works

Hardscape, softscape coordination and external area development.

08

IT & Digital Solutions

Infrastructure support, cybersecurity, business software, dashboards and automation.

Scope aligned from the client-supplied legacy profile and strengthened with ICT/ELV and digital delivery capabilities.

Construction & Civil Works

- Building construction work
- Civil and concrete works
- Site preparation and coordination
- Architectural and finishing works
- Renovation and maintenance works
- Inspection support and handover documentation

Delivery focus: safe access, clear interfaces, coordinated sequencing and quality records before handover.

SITE DEVELOPMENT

Roads, Earthworks & External Works

A coordinated approach to earthworks, roadworks and external site activities helps reduce interface risk and supports smoother progress into construction and services installation.

Earthworks and grading

Road works and asphalt activities

Backfilling and site development

Equipment coordination

External utilities and pathways

STRUCTURAL WORKS

Structural Steel & Fabrication Support

01

Structural frames

Steel structures and installation coordination.

02

Fabrication interfaces

Shop/site coordination, delivery sequencing and tolerance awareness.

03

Inspection support

Access, safety, visual checks and punch-list closure.

Architectural Finishing, Interiors & Maintenance

Architectural / finishing works

Interior works

Renovation works

General maintenance

Client-facing spaces

MEP, HVAC & Fire Protection

01

Electrical Systems

Distribution, panels, earthing, containment and controls.

02

HVAC & Ventilation

Equipment interfaces, airflow pathways, control panels and ceiling coordination.

03

Plumbing & Drainage

Water supply, drainage interfaces and plantroom coordination.

04

Fire Protection

Pumps, valves, pipework and life-safety coordination.

ICT & ELV SYSTEMS

Structured, secure and serviceable low-current environments.

US Arabia Global supports technology-heavy project environments through practical field coordination, system inspection, troubleshooting and documentation.

Structured cabling & racks

Active networks and Wi-Fi

CCTV and control rooms

Access control and intercom

Fire alarm interfaces

PA/BGM and IPTV

IT Infrastructure & Business Solutions

01

Managed IT Infrastructure

Servers, endpoints, networks, backups, access control and operational IT support.

02

Cybersecurity Support

Hardening, account hygiene, safe configuration, monitoring support and user awareness.

03

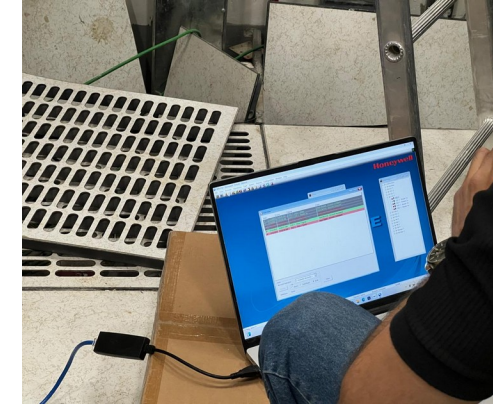

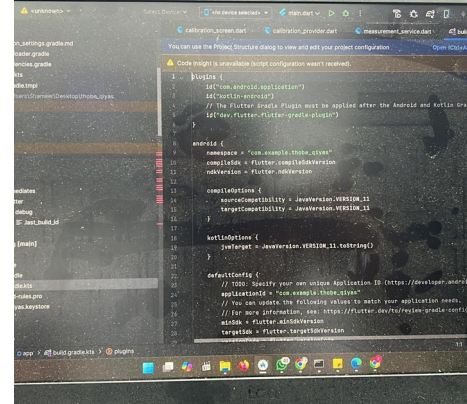

Business Applications

Custom web systems, workflow tools, dashboards, reporting and internal automation.

04

Data & Reporting

Operational dashboards, task tracking, forms, document flows and management visibility.

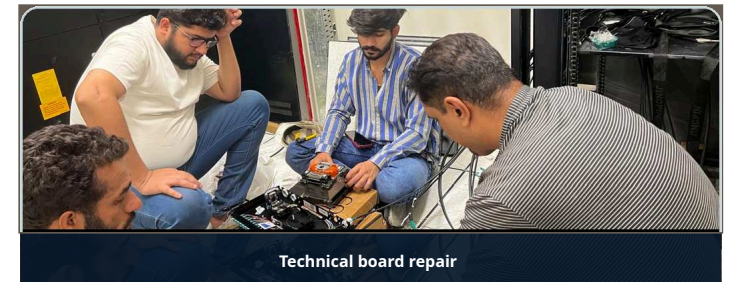

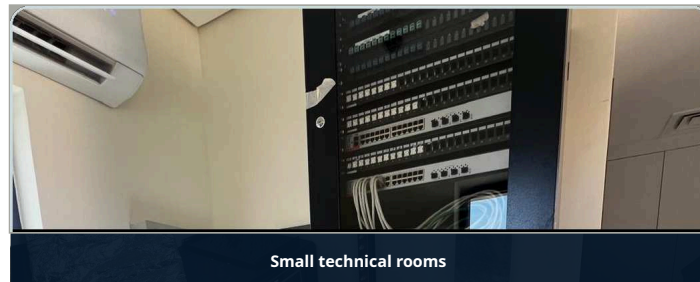

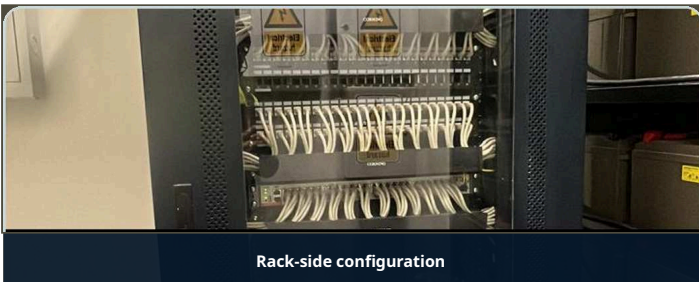

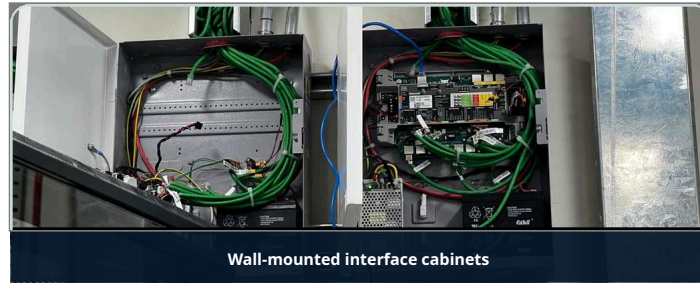

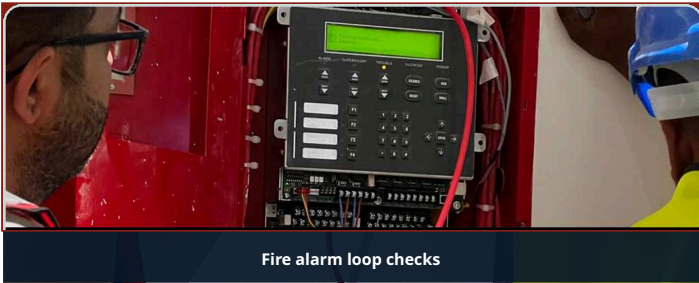

Central Services Center, Wadi Safar - DGCL

Riyadh, Saudi Arabia | ICT/ELV coordination, testing, commissioning and operational support.

Presented as hands-on experience of the company's ICT/ELV leadership team. Scope includes inspection support, rack-side coordination, system troubleshooting, stakeholder communication and close-out documentation.

HEALTH, SAFETY & ENVIRONMENT

Safe work is planned before the work starts.

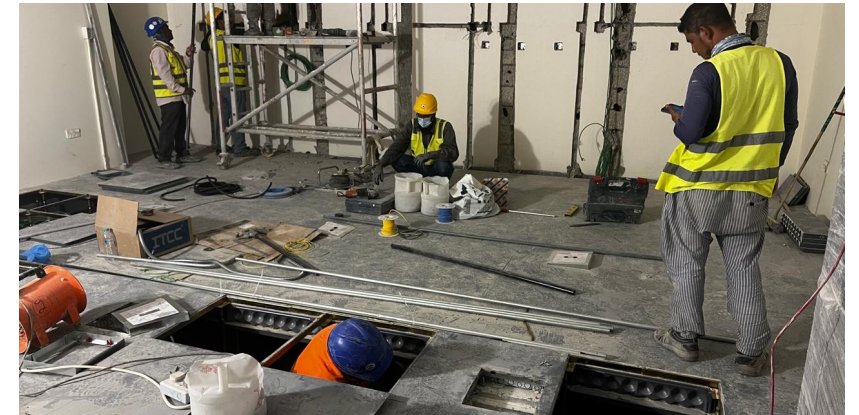

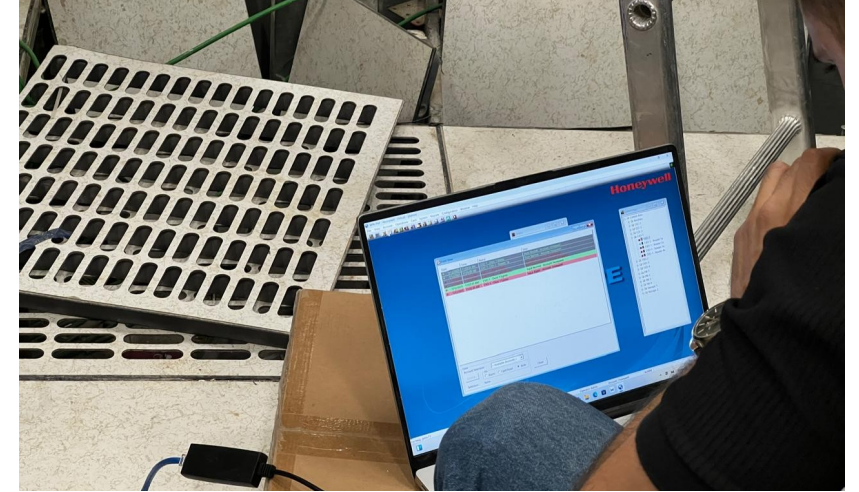

US Arabia Global is committed to conducting its activities in a manner that protects employees, subcontractors, clients, visitors, the public and the surrounding environment.

- ✓ **Hazard identification and risk awareness**
- ✓ Trained and authorized personnel
- ✓ Proper PPE and safe access
- ✓ Permit, method-statement and site-rule compliance
- ✓ Incident, near-miss and unsafe-condition reporting

Documented quality from scope to handover.

- | | | |
|----|-----------------|--|
| 01 | Review | Drawings, specifications and scope. |
| 02 | Approve | Materials, equipment and method statements. |
| 03 | Inspect | Stage inspections and observation closure. |
| 04 | Test | Functional checks, commissioning and evidence. |
| 05 | Handover | Documents, training and support. |

From definition to operational support.

01

Define

Scope, responsibilities, risks and acceptance criteria.

02

Coordinate

Interfaces, access, materials, stakeholders and schedule.

03

Deliver

Safe execution, supervision and issue control.

04

Validate

Inspection, testing, commissioning and rectification.

05

Support

Handover, training, troubleshooting and maintenance support.

The method is designed for multidisciplinary scopes, where civil works, building systems, ICT/ELV and operational support need coordinated ownership from start to close-out.

Client-supplied legacy experience snapshot

01

Civil & Building Works

Multipurpose centers, factory buildings, kitchen/toilet/SCECO rooms and civil structures.

02

Renovation & Maintenance

Office building glass replacement, repainting, villa repair and general building maintenance.

03

Finishing Works

Ceramic tile works, screed, gypsum ceiling, villa finishing and interior improvements.

04

Site Development

Backfilling, earthworks, site development and external area preparation.

05

Roads & Equipment Support

Road works, equipment rental coordination and associated site activities.

06

Industrial / Commercial Assets

Factories, housing, commercial and industrial building support.

Note: project values, certifications and performance statistics should be published only after formal verification and client approval.

WHY US ARABIA GLOBAL

One partner for coordinated delivery across the built and connected environment.

- | | | |
|----|------------------------------|---|
| 01 | Integrated capability | Construction, MEP, infrastructure, ICT/ELV and digital support through one coordinated interface. |
| 02 | Hands-on leadership | Practical field, commissioning, troubleshooting and operational experience. |
| 03 | Clear communication | Structured coordination with clients, consultants, contractors and vendors. |
| 04 | Responsible claims | Capabilities and achievements are presented accurately and updated as verified. |

**LET'S CONNECT, BUILD, IMPROVE,
AND GROW TOGETHER.**
